

Service Catalog

Who doesn't love a seamless shopping experience? Especially when you're shopping around for items to increase productivity at work. That's where the Service Catalog comes in! The Service Catalog application allows users to view, request, and shop around for services and products. This one-stop-shop is right at your fingertips in your instance! You can order catalog items or save them for later in your cart. You can always refer to Open Records for catalog items to view requests, items, and tasks. As a tip, you may want to favorite the Service Catalog in your instance since it's great to always have this application handy. Now you try! Order your first catalog item in the Service Catalog activity.
